To-Do Date: Oct 5

Topics for Course Project

All Sections

1. Project is a great way to learn because you frame your own questions / problems and come up with your own solutions!

2. Discover your passion and do something different that will have a lasting impact on your career. If you do something for which solutions are already available online, it's an opportunity wasted.

3. To quote a student who took my course in the past: "... the class project was a lot of fun to work on and it was the most fun I've had with a school project in years!"

4. There have been students who got a job based on the project done for my course, presented in user conferences and others who have published a research paper with me and got into newspapers, based on the course project. So, please choose your project topic wisely! If your work is commendable, I can work with you to get the credit it deserves.

5. Study Groups that you formed on Canvas will work on the project and other assignments. **The purpose of this discussion is mainly to avoid multiple teams doing the same or similar project.**

6. Browse through the syllabus, assignment descriptions, and project rubrics to understand what is required of you.

7. A couple relevant videos that you may want to watch:
